Allowable Subject Matter

1. Claims 1-4, 6-7, 10-13, 15-25 are allowable over the prior art of records.
2. The following is an Examiner's statement of reasons for the indication of allowable subject matter: Claims 1,6-7, 11, 18 are allowable over the prior art of record because the prior art, cited in its entirety, does not show any motivation to combine any of the prior arts which teach the step of configuring the segments of the pathways in the interconnect to pass a payload of information from the initiating network resource to the available target network resource while isolating other segments of the pathways in the interconnect not part of the payload of information transfer between the initiator network resource and the available target network resource (claims 1, 7, 18); transitioning voltage levels on the segments of the pathways in the interconnect to communicate the payload of information to the available target network resource in a cycle after the arbitration results are determined (claim 6); wherein the first stage of circuitry to route an incoming payload of information to a central point and the second stage of circuitry to route the payload of information from the central point (claim 14); wherein the interconnect comprises: a first stage of circuitry to receive incoming transactions from the plurality of initiator network resources and to route an incoming payload of information to a central point; and a second stage of circuitry to pass outgoing transactions to target network resources connecting to the interconnect and to route the payload of information from the central point (claim 11).

The remaining claims, not specifically mentioned, are allowed for the same rationale as set for their parent claims.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should

preferable **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
